Introduction

We have reviewed the accompanying interim condensed consolidated statement of financial position of Gulf Bank K.S.C.P. (the "Bank") and its subsidiary (collectively the "Group") as at 30 September 2026, and the related interim condensed consolidated statement of income and interim condensed consolidated statement of comprehensive income for the three months and nine months period then ended and the related interim condensed consolidated statement of cash flows and interim condensed consolidated statement of changes in equity for the nine months period then ended. The management of the Bank is responsible for the preparation and presentation of this interim condensed consolidated financial information in accordance with the basis of presentation set out in Note 2. Our responsibility is to express a conclusion on this interim condensed consolidated financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "*Review of Interim Financial Information Performed by the Independent Auditor of the Entity*". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial information is not prepared, in all material respects, in accordance with the basis of presentation set out in Note 2.

Report on Other Legal and Regulatory Requirements

Furthermore, based on our review, the interim condensed consolidated financial information is in agreement with the books of account of the Bank. We further report that, to the best of our knowledge and belief, we have not become aware of any violations of the Companies Law No. 1 of 2016, as amended, and its executive regulations, as amended, or of the Bank's Memorandum of Incorporation and Articles of Association, as amended, during the nine months period ended 30 September 2026 that might have had a material effect on the business of the Bank or on its financial position.

We further report that, during the course of our review, to the best of our knowledge and belief, we have not become aware of any material violations of the provisions of Law No. 32 of 1968, as amended, concerning currency, the Central Bank of Kuwait and the organization of banking business, and its related regulations, during the nine months period ended 30 September 2026 that might have had a material effect on the business of the Bank or on its financial position.

12. DERIVATIVES

In the ordinary course of business the Group enters into various types of transactions that involve derivative financial instruments. A derivative financial instrument is a financial contract between two parties where payments are dependent upon movements in price of one or more underlying financial instruments, reference rate or index.

The table below shows the positive and negative fair value of derivative financial instruments, together with the notional amounts analysed by the term to maturity. The notional amount is the amount of a derivative's underlying asset, reference rate or index and is the basis upon which changes in the value of derivatives are measured.

The notional amounts indicate the volume of transactions outstanding at the period end and are not indicative of either market or credit risk. All derivative contracts are fair valued based on observable market data.

The amortized cost and fair value of investment securities at amortised cost as at 30 September 2026 were **KD 160,370 thousand** (31 December 2025: KD 278,696 thousand; 30 September 2025: KD 222,419 thousand) and **KD 158,937 thousand** (Level 1) (31 December 2025: KD 279,306 thousand; 30 September 2025: KD 223,390 thousand) respectively.

The following table analyses the movement in level 3 of financial assets:

Financial assets at FVOCI: Equity securities	**At 1 January KD 000's**	**Change in fair value KD 000's**	**Additions/ disposals KD 000's**	**Exchange rate movements KD 000's**	**At 30 September KD 000's**
2026	**22,556**	**9**	**(1,006)**	**9**	**21,568**
2025	21,275	11	(355)	(2)	20,929

Fair value of all financial instruments are not materially different from their carrying values. For financial assets and financial liabilities that are liquid or having a short-term maturity (less than three months), the carrying amounts approximate to their fair value and this applies to demand deposits, savings accounts without a specific maturity and variable rate financial instruments.

The fair value of the above investment securities classified under Level 1, Level 2 and Level 3 is categorised as per the policy on fair value measurement in note to the annual consolidated financial statements. During the period, there were no transfers between any of the fair value hierarchy levels.

The positive and negative fair values of forward foreign exchange contracts are valued using significant inputs of observable market data and accordingly classified as Level 2. Refer Note 12.

Other financial assets and liabilities are carried at amortized cost and the carrying values are not materially different from their fair values as most of these assets and liabilities are of short term maturities or are repriced immediately based on market movement in interest rates.

14. GEOPOLITICAL EVENTS IMPACT

Geopolitical escalation risk

Geopolitical events in the Middle East that commenced in late February 2026 have affected GCC countries, including Kuwait where the Group primary operates, resulting in regional disruptions such as airspace closures, flight cancellations, supply chain delays and heightened uncertainty. These developments continue to evolve and have created increased business and economic uncertainties.

Support measures on Geopolitical events

On 26 March 2026, CBK implemented various measures targeted at reinforcing the banking sector's ability to play a vital role in the economy, with the aim to provide the necessary liquidity for businesses to continue their operations without interruption and limit the transformation of short term liquidity challenges into long term risks that could affect financial solvency. Some of the important measures are given below:

- Decrease the Liquidity Coverage Ratio from 100% to 80%
- Decrease the Net Stable Financing Ratio from 100% to 80%
- Decrease the regulatory Liquidity Ratio from 18% to 15%
- Increase the maximum limits of the negative cumulative gap for liquidity across various time bands
- Increase the maximum lending limit from 90% to 100%
- Releasing 1% of Capital Conservation Buffer in the form of CET1, thereby reducing the minimum comprehensive capital requirement from 13% to 12%

Expected Credit Loss estimates

The Group has considered the potential impact of the uncertainties caused by the ongoing geopolitical events together with the relief measures of CBK in its estimation of ECL requirements for the period ended 30 September 2026. The Group takes into account their historic experience of losses updated to reflect current conditions as well as forecasts of future economic conditions to assess if there is significant increase in credit risk or objective evidence of impairment in the light of ongoing geopolitical events.

Notwithstanding the above, ECL requirement for credit facilities estimated as at 30 September 2026 continues to be lower than the provisions required as per CBK instructions. In accordance with Group's accounting policy, the higher amount, being the provision required as per CBK instructions, is therefore recognized as the provision requirement for credit losses on credit facilities.

Business continuity

In response to the ongoing geopolitical events, the Group has implemented protocols and processes to help protect employees, customers and community partners. These measures include: leveraging our online platforms and business continuity plans and enhancing our capabilities to support employees to work from home, and pre-planned contingency strategies for critical site-based operations. These capabilities have allowed us to continue to service our customers. The Group will continue to manage the increased operational risk related to the execution of our business continuity plans in accordance with Risk Management policies.
